

Claude for *entrepreneurs.*

3 hours, your laptop, one job you actually hate. You leave with it running.

Liezl Kruger

R&D · Cape of Storms Apothecary

THE JOB YOU NAMED

Open to all tips, moving into a new business model and target audience.

What you walk out with

6 things, running, on your own machine. Not notes about how you might do it later.

1 A Project that knows your business

Your documents, numbers and standards, in one place that outlives the chat.

2 Live data

Your real email, drive or accounts — not a demo.

3 One real artefact

Built in the room, off your own numbers.

4 A skill that repeats your process

The job you do every month, captured once.

5 One job running on a schedule

The first thing that happens without you.

6 A 14-day call and a 30-day review

Because the room is only a third of it.

BRING

- A laptop and a charger
- One real, messy file from your business — not a tidy example
- Your logo, a couple of photos, an old deck or brochure if you have one
- Claude installed and signed in, with the workshop skill added

ONE RULE

You won't be asked to write code, open a terminal, or install anything beyond the app itself. If a step ever seems to need it, say so — it means we've taken a wrong turn, not that you've missed something.

The three hours

Roughly a quarter teaching, the rest you, doing it.

TIME		WHAT
10:00	12'	Setup and triage Logged in, everything working. Problems solved now, not at 11:30.
10:12	13'	Name the job Four jobs on the board. That list is the spine of the session.
10:25	20'	Briefing, not prompting Rewrite your worst prompt as a proper brief. Watch what changes.
10:45	30'	Build the business brain A real Project — your documents, your numbers, your standards.
11:15	15'	Break The café is downstairs.
11:30	30'	Point it at real data Connect your email, drive or accounts. Ask about your own numbers.
12:00	35'	Delegate the job Hand over the job you named. Get back something real.
12:35	15'	Make it repeat Turn what worked into a skill. Put it on a schedule.
12:50	10'	Commit and close One thing you'll do by Friday. We book the 14-day call here.

If you fall behind, get to 12:00. That's the block that makes the day worth it. Everything before it is setup and everything after it is making it repeat — but the middle is where you hand over a real job and get something back.

Briefing, not prompting

The single biggest difference between people who find this underwhelming and people who don't. A prompt asks for a thing. A brief says what you're trying to achieve and hands over what's needed to do it.

THE FIVE PARTS

- 1. **The job.** What you actually want done, and why it matters.
- 2. **The context.** Your business, your numbers, your constraints.
- 3. **The material.** The real file. Not a description of the file.
- 4. **What good looks like.** How you'd know it was done properly.
- 5. **The format.** A spreadsheet, a page, a document, an email.

WRITE YOUR WORST PROMPT HERE — THE ONE THAT GAVE YOU A DISAPPOINTING ANSWER.

NOW WRITE IT AS A BRIEF.

Does the subscription box actually work?

You have the direction — a R1,000 monthly box, Cape Town only. What you don't have yet is whether the numbers hold. So we build the model: what goes in the box, what it costs you, what's left, and what it really takes to get to a thousand subscribers. Then you change the assumptions until you find a version you believe.

WHAT IT NEEDS FROM YOU

- Your product list with prices, and roughly what each costs to make
- What delivery costs you per order today
- Your best guess at how many subscribers would cancel in a month
- Anything you've already written about the new direction — rough is fine

WHAT REPEATS AFTERWARDS

A monthly subscriber review — who joined, who left, where the run rate to a thousand stands.

WATCH FOR

Don't take the plan on faith, including mine. The point of the model is that you can break it: change the price, change how often the box goes out, change what's in it. The version you leave with should be one you argued yourself into.

NOTES — ASSUMPTIONS, NUMBERS, THINGS TO FIX LATER

Before you leave

Most training evaporates inside a fortnight. This is the page that decides whether yours does.

THE ONE THING I'LL DO BY FRIDAY

WHAT I BUILT TODAY, AND WHERE IT LIVES

WHAT I'D BUILD NEXT, IF THIS WORKS

WHAT HAPPENS NOW

- **Day 1** — your asset pack: Project template, the skill you built, my prompt library
- **Day 14** — a 60-minute group call. One win and one blocker each. This is the call that decides whether it sticks
- **Day 30** — a written review: what's working, what isn't, what's next

STUCK BETWEEN NOW AND THEN

Tell Claude what happened — it can fix most of it. If it can't, mail me. I'd rather hear about it on the Tuesday than at the 14-day call.

Johannes
