

Claude for *entrepreneurs.*

3 hours, your laptop, one job you actually hate. You leave with it running.

Kowie Lotter

GM · Creative Beverages

THE JOB YOU NAMED

A lot of data from Checkers, PnP, Makro and Tops — stock on hand and sales-out at store level, weekly.

I want it turned into usable information: stores out of stock, top performing stores, slow selling stores.

What you walk out with

6 things, running, on your own machine. Not notes about how you might do it later.

1 A Project that knows your business

Your documents, numbers and standards, in one place that outlives the chat.

2 Live data

Your real email, drive or accounts — not a demo.

3 One real artefact

Built in the room, off your own numbers.

4 A skill that repeats your process

The job you do every month, captured once.

5 One job running on a schedule

The first thing that happens without you.

6 A 14-day call and a 30-day review

Because the room is only a third of it.

BRING

- A laptop and a charger
- One real, messy file from your business — not a tidy example
- Your logo, a couple of photos, an old deck or brochure if you have one
- Claude installed and signed in, with the workshop skill added

ONE RULE

You won't be asked to write code, open a terminal, or install anything beyond the app itself. If a step ever seems to need it, say so — it means we've taken a wrong turn, not that you've missed something.

The three hours

Roughly a quarter teaching, the rest you, doing it.

TIME		WHAT
10:00	12'	Setup and triage Logged in, everything working. Problems solved now, not at 11:30.
10:12	13'	Name the job Four jobs on the board. That list is the spine of the session.
10:25	20'	Briefing, not prompting Rewrite your worst prompt as a proper brief. Watch what changes.
10:45	30'	Build the business brain A real Project — your documents, your numbers, your standards.
11:15	15'	Break The café is downstairs.
11:30	30'	Point it at real data Connect your email, drive or accounts. Ask about your own numbers.
12:00	35'	Delegate the job Hand over the job you named. Get back something real.
12:35	15'	Make it repeat Turn what worked into a skill. Put it on a schedule.
12:50	10'	Commit and close One thing you'll do by Friday. We book the 14-day call here.

If you fall behind, get to 12:00. That's the block that makes the day worth it. Everything before it is setup and everything after it is making it repeat — but the middle is where you hand over a real job and get something back.

Briefing, not prompting

The single biggest difference between people who find this underwhelming and people who don't. A prompt asks for a thing. A brief says what you're trying to achieve and hands over what's needed to do it.

THE FIVE PARTS

- 1. **The job.** What you actually want done, and why it matters.
- 2. **The context.** Your business, your numbers, your constraints.
- 3. **The material.** The real file. Not a description of the file.
- 4. **What good looks like.** How you'd know it was done properly.
- 5. **The format.** A spreadsheet, a page, a document, an email.

WRITE YOUR WORST PROMPT HERE — THE ONE THAT GAVE YOU A DISAPPOINTING ANSWER.

NOW WRITE IT AS A BRIEF.

Your weekly retailer read

Your PnP and Makro files look nothing alike — one is a table, the other a 30-day grid, and they share not one SKU name. So we build the thing that makes them the same shape, put your price list against it, and answer your three questions in rands instead of units. Out of stock, selling, not selling — across retailers, from one place.

WHAT IT NEEDS FROM YOU

- The Checkers and Tops exports — untidied, as they arrive (PnP, Makro and the price list already sent, thank you)
- Which Site Article Statuses count as active, and which are noise
- Whether Happy Days, Suncove, Malachite and Distillery Road are still live — they're in PnP's data but not on the August price list
- What 'slow' means in your business — a number, not a feeling

WHAT REPEATS AFTERWARDS

A skill for the other three retailers, and a Monday morning read waiting for you before your first meeting.

WATCH FOR

Both files have a trap in them. PnP's Days Cover reads zero for stores that are fully stocked but not selling, so the obvious sort is 82% wrong. Makro's blanks mean 'not listed', not 'none left' — read them as zero and you invent thousands of out-of-stocks. We fix both first. A combined league table across retailers is a later job, not a Saturday one.

NOTES — ASSUMPTIONS, NUMBERS, THINGS TO FIX LATER

Before you leave

Most training evaporates inside a fortnight. This is the page that decides whether yours does.

THE ONE THING I'LL DO BY FRIDAY

WHAT I BUILT TODAY, AND WHERE IT LIVES

WHAT I'D BUILD NEXT, IF THIS WORKS

WHAT HAPPENS NOW

- **Day 1** — your asset pack: Project template, the skill you built, my prompt library
- **Day 14** — a 60-minute group call. One win and one blocker each. This is the call that decides whether it sticks
- **Day 30** — a written review: what's working, what isn't, what's next

STUCK BETWEEN NOW AND THEN

Tell Claude what happened — it can fix most of it. If it can't, mail me. I'd rather hear about it on the Tuesday than at the 14-day call.

Johannes
