Johannes le Roux. ENTREPRENEUR COACH

Claude for *entrepreneurs.*

3 hours, your laptop, one job you actually hate. You leave with it running.

Kowie Lotter

GM · Creative Beverages

THE JOB YOU NAMED

A lot of data from Checkers, PnP, Makro and Tops — stock on hand and sales-out at store level, weekly.

I want it turned into usable information: stores out of stock, top performing stores, slow selling stores.

Saturday 22 August 2026 · 10:00 – 13:00

CHIPS · 21 Roodehek Street, Gardens

What you walk out with

6 things, running, on your own machine. Not notes about how you might do it later.

1 **A Project that knows your business**
Your documents, numbers and standards, in one place that outlives the chat.

2 **Live data**
Your real email, drive or accounts — not a demo.

3 **One real artefact**
Built in the room, off your own numbers.

4 **A skill that repeats your process**
The job you do every month, captured once.

5 **One job running on a schedule**
The first thing that happens without you.

6 **A 14-day call and a 30-day review**
Because the room is only a third of it.

BRING

- A laptop and a charger
- One real, messy file from your business — not a tidy example
- Your logo, a couple of photos, an old deck or brochure if you have one
- Claude installed and signed in, with the workshop skill added

> ONE RULE
>
> You won't be asked to write code, open a terminal, or install anything beyond the app itself. If a step ever seems to need it, say so — it means we've taken a wrong turn, not that you've missed something.

The three hours

Roughly a quarter teaching, the rest you, doing it.

TIME		WHAT
10:00	12′	**Setup and triage** Logged in, everything working. Problems solved now, not at 11:30.
10:12	13′	**Name the job** Eight jobs on the board. That list is the spine of the session.
10:25	12′	**Briefing, not prompting** Rewrite your worst prompt as a proper brief. Watch what changes.
10:37	30′	**Build the business brain** A real Project — your documents, your numbers, your standards.
11:07	15′	**Break** The café is downstairs.
11:22	30′	**Point it at real data** Connect your email, drive or accounts. Ask about your own numbers.
11:52	43′	**Delegate the job** Hand over the job you named. Get back something real.
12:35	15′	**Make it repeat** Turn what worked into a skill. Put it on a schedule.
12:50	10′	**Commit and close** One thing you'll do by Friday. We book the 14-day call here.

If you fall behind, get to 11:52. That's the block that makes the day worth it. Everything before it is setup and everything after it is making it repeat — but the middle is where you hand over a real job and get something back.

Briefing, not prompting

The single biggest difference between people who find this underwhelming and people who don't. A prompt asks for a thing. A brief says what you're trying to achieve and hands over what's needed to do it.

THE FIVE PARTS

1. **The job.** What you actually want done, and why it matters.
2. **The context.** Your business, your numbers, your constraints.
3. **The material.** The real file. Not a description of the file.
4. **What good looks like.** How you'd know it was done properly.
5. **The format.** A spreadsheet, a page, a document, an email.

WRITE YOUR WORST PROMPT HERE — THE ONE THAT GAVE YOU A DISAPPOINTING ANSWER.

NOW WRITE IT AS A BRIEF.

Your weekly retailer read

Your three retailers send three unrelated formats measuring three different things, so we build one account at a time — starting with Checkers, where the money and the trend are. Out of stock, selling, not selling, in rands. Patch reported separately, the way Checkers already structures it.

WHAT IT NEEDS FROM YOU

- The Tops export, if it comes — everything else is in, thank you
- Which Site Article Statuses count as active, and which are noise
- Whether Happy Days, Suncove, Malachite and Distillery Road are still live — they're in PnP's data but not on the August price list
- What 'slow' means in your business — a number, not a feeling

WHAT REPEATS AFTERWARDS

A skill that turns a Checkers export into your read, so next week is a drag-and-drop — then the same pattern for PnP and Makro. And a Monday morning brief waiting before your first meeting.

> **WATCH FOR**
>
> Every file has a trap. Checkers repeats each article once per pack size, so totals come out 3 to 5 times too big. PnP's Days Cover reads zero for stores that are fully stocked but not selling. Makro's blanks mean 'not listed', not 'none left'. We fix those first, then build. One account properly beats four half-done.

NOTES — ASSUMPTIONS, NUMBERS, THINGS TO FIX LATER

Before you leave

Most training evaporates inside a fortnight. This is the page that decides whether yours does.

THE ONE THING I'LL DO BY FRIDAY

WHAT I BUILT TODAY, AND WHERE IT LIVES

WHAT I'D BUILD NEXT, IF THIS WORKS

WHAT HAPPENS NOW

- **Day 1** — your asset pack: Project template, the skill you built, my prompt library
- **Day 14** — a 60-minute group call. One win and one blocker each. This is the call that decides whether it sticks
- **Day 30** — a written review: what's working, what isn't, what's next

STUCK BETWEEN NOW AND THEN

Tell Claude what happened — it can fix most of it. If it can't, mail me. I'd rather hear about it on the Tuesday than at the 14-day call.
